

BIOGRAPHY OVERVIEW

Andrea Desimone - Master Degree in Architecture at Milan Polytechnic, 2000.
In 2001 Andrea founded his company, Andrea Desimone Architect, based in a XIX Century Italian villa in Monferrato area.
Monferrato, appointed by UNESCO on June 2014 as world heritage site, is the place where he intends to recreate the spirit of the Renaissance atelier, where clients, suppliers and consultants can share ideas and start up planning.
Multidisciplinary planning is oriented to the needs of clients and environment, which are the key points of the planning philosophy, operating in many sectors and scales of intervention, from urban and strategic planning to interior design.
This particular atmosphere allows clients (private, multinational corporations, public administrations) to get a clear vision of every phase of their investments, respecting timing and target required.
